**DETAILED ACTION**

***Status of Claims***

Claims 1-68 are pending

Claims 1-40, 43-47, 49-53 and 56-68 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected inventions and species.

Claims 41-42, 48 and 54-55 are under examination.

***Withdrawn Rejection and Objection***

The objection to the specification is withdrawn in view of applicant's statement that the description of the Figures in the specification contains the Seq. ID. Nos.

In view of the amendments to the claims, the rejection of the claims under 35 USC 112, first and second paragraph is withdrawn. Also, the 35 USC 103 rejection is withdrawn.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 41-42, 48 and 54-55 are rejected under 35 U.S.C. 102(e) as being anticipated by Comb et al (USP 6,982,318).

The claimed antibody that binds a phosphoThr having the amino acid sequence Nos. 298-347, 349-473 is fully met by the antibodies of Comb. Comb discloses the same antibodies (e.g., col. 19, Example 8) that binds a phosphoThr(pThr) or phosphoSer(pSer) having amino acids shown in any one of the Seq. ID. Nos. 1-11, inter alia, containing pSer or pThr at e.g., position 8.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 1639

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 41-42, 48 and 54-55 are rejected under 35 U.S.C.

103(a) as being unpatentable over Comb et al.

Comb et al is discussed above. Comb at e.g., Seq. ID. 14 of the Sequence Listing discloses or shows a 14-residue peptide sequence that encompasses, the instant peptide. Comb teaches at e.g., col. 1, lines 10-15 motif-specific, context-independent antibodies which are specific to at least one fixed amino acid residue, in the context of variable surrounding amino acid or peptides sequences. Antibodies with these properties are useful in characterizing various forms of cellular regulation as well as serving to profile genome wide changes in cellular protein levels and protein modification. It would be within the ordinary skill in the art at the time the invention was made to choose and pick from the 20 naturally occurring residues, except Cys, as taught by Comb, to arrive at the instant claimed sequences. The motivation to do such is recited by Comb above.

No claim is allowed.

**Conclusion**

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

This application contains claims 1-40, 43-47, 49-53 and 56-68 are drawn an invention nonelected. A complete reply to the final rejection must include cancellation of nonelected claims or other appropriate action (37 CFR 1.144) See MPEP § 821.01.
